## Explanation of QC Flag Comments:

Code	Explanation						
Α	This analysis was performed on a VOA sample containing headspace.						
В	Analyte detected in method blank, but not in associated samples.						
B1	The sample concentration is greater than 5 times the blank concentration.						
B2	The sample concentration is less than 5 times the blank concentration.						
В3	Dilution water blank of BOD was above the recommended limit; associated samples could be high biased.						
СР	Client provided value.						
CV	Calculated value.						
E	Analyte concentration exceeds the calibration range, results are estimated.						
E1	Estimated value.						
E2	Estimated value. Matrix interference observed.						
Н	Holding time was exceeded.						
J	Estimated value, above the detection limit and below the LOQ						
I	Insufficient sample received to meet method requirements.						
LOQ1	Quantitation level raised due to low sample volume and/or dilution.						
LOQ2	Quantitaion level raised due to matrix interference.						
LOQ3	< LOQ could be due to potential inhibition.						
N1	See case narrative						
Р	Not preserved to the proper pH						
P1	Storage temperature out of control						
P2	Incubator temperature out of control						
Q	Matrix interferences affecting spike or surrogate recoveries.						
Q1	Quality control result biased high. Only non-detect samples reported.						
Q2	Quality control outside QC limits. Data considered estimate.						
Q3	Sample concentration greater than four times the amount spiked.						
Q4	Non-homogenous sample matrix, affecting RPD result and/or % recoveries.						
Q5	Spike results above calibration curve.						
Q6	Quality control outside QC limits. Data acceptable based on remaining QC.						
Q7	Quality control outside QC limits.						
R	Relative percent difference (RPD) outside control limit.						
R1	RPD non-calculable, as sample or duplicate results are less than five times the LOQ.						
R2	Sample replicates RPD non-calculable, as only one replicate is within the analytical range.						
RE	Re-extracted and/or re-analyzed.						
REH	The original analysis was within holding time; re-analysis past holding time.						
S	Surrogate recovery outside control limit.						
Т	Tentatively Identified Compound (TIC) by library search.						
T1	Confirmed by secondary ion						
W	Results are reported on dry weight basis.
